

Drone Soccer Class20 3X3 (Brushless) Rule

20 cm Drone Soccer - 3 Players (Brushless Motor)

Participant Eligibility

1. Each team consists of 3 members, and all 3 members compete in each match.
2. There is no age limit for competitors.
3. One team controller/coach is permitted (or the team may compete without one). The team controller/coach may not participate in the match.
4. A team member may not be listed on another team within the same rule category.

Drone Requirements

1. Any brand of spherical four-propeller drone may be used. The drone diameter must be **20 cm +/- 1 cm** and the total weight must not exceed **300 g** (including the battery, excluding the remote controller). **Brushless motors only.**

2. The drone must be remotely controlled using a radio transmitter / remote controller.
3. **The battery must have a clearly readable information label. Batteries with no label or with a faded/illegible label are not permitted in the competition.**
4. The competitor must present the drone to the referee for inspection before entering the competition field every time.

Competition Rules

This is an **indoor** competition on a field measuring approximately **4 x 8 meters**.

1. Two teams compete in each match: a Red Team and a Blue Team. The drone must display the assigned LED color or another clearly visible identifying mark. Player positions must be declared to the referee so the Striker can be tagged.

2. Each set lasts 3 minutes. The match is played over 3 sets, with the winner determined by best-of-three (first team to win 2 sets). **If there are many participating teams, the set time may be changed to 2 minutes.*
3. Competitors may take off only after the referee gives the official start signal.
4. Only the Striker may score, by flying through the opponent's goal ring.
5. After the Striker flies through the opponent's goal, the goal LED will light. All players must retreat behind the Center Line before the referee confirms the score. A new scoring attempt may begin after the LED turns off. If a player scores without waiting for the LED signal to turn off, that goal will not be counted.

Category	Score approved	Score disapproved	Return declared	Return completed
Flag				
GOAL LED Color	 change to RED	 stay WHITE	 stay RED	 change to WHITE

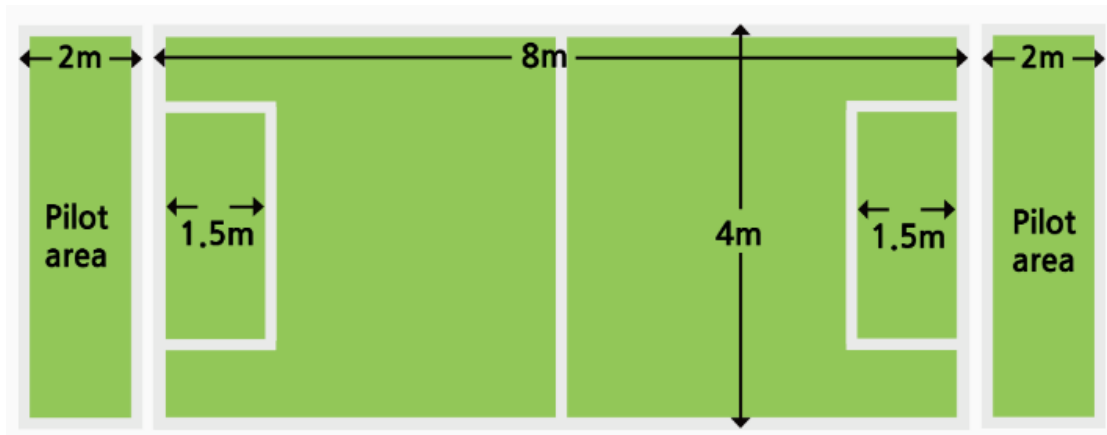

6. If a player in any position can no longer continue flying, **the player must put down the remote controller and raise both hands** to notify the referee.
7. When the competition time ends (3 minutes), the referee will blow the whistle. Competitors must land their drones and stop the propellers (Landing).
8. Players are not permitted to enter the field until the competition time has ended and the referee has authorized drone retrieval.
9. The match result is determined by valid goals scored through the ring. The team with the higher score is the winner.
5. If any participating team intentionally interferes with an opponent's flight and causes a flight accident, the referee will disqualify that team from the competition.
6. **For any other incident or circumstance occurring inside the field, the referee's ruling, decision, and discretion are final.**

*** Notes:

- If the competition rules are changed, the organizing committee will notify competitors on the competition day.
- The referee will explain the rules again before the competition begins.

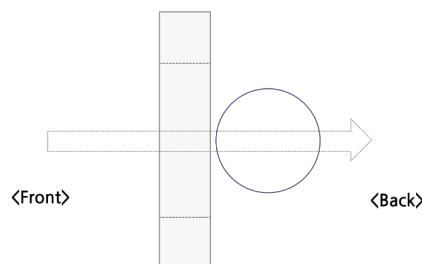

Competition Field Layout

1. The competition field is approximately 4 x 8 meters and is enclosed by safety netting.

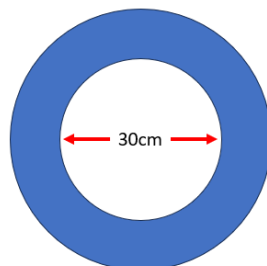

Top View of the Competition Field

2. The Goal is a ring with an approximate diameter of 30-37 cm.

3. To score, the drone must fly completely through the Goal.

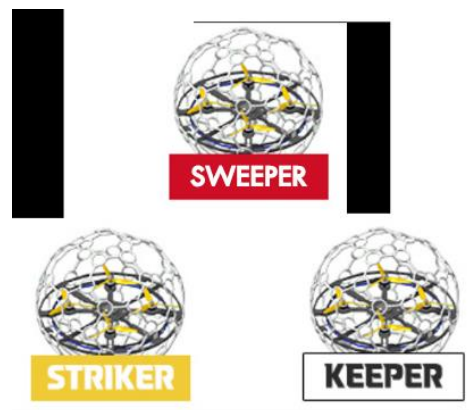

4. **Player positions are as follows:**

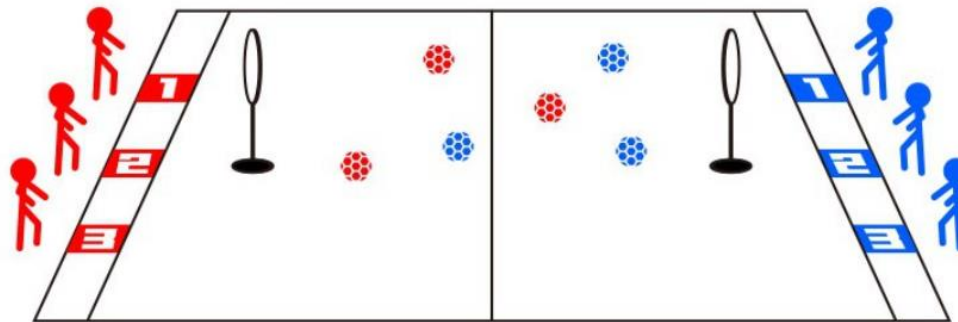

STRIKER - The scoring player.

SWEEPER - The midfield player. The Sweeper engages the opponent's defenders to make it easier for the Striker to score, or helps defend against the opponent's attack. The Sweeper may not score.

KEEPER - The goalkeeper. The Keeper intercepts and blocks the opponent from flying through the goal. The Keeper may not score.

5. Players are divided into two sides: the Red Team and the Blue Team. Pilots remain outside the net on their own side of the field and attempt to fly their drones through the opponent's goal ring to score.

Responsibility

1. Each participating team is responsible for the safety of its own drone and is responsible for any accident caused by a team member or by the team's drone.
2. The organizer shall not be responsible for any incident and/or accident arising from participation in the competition or from the equipment used by a participating team.
