

Super Pilot - Senior

Ultimate Drone Pilot - Senior (Age 19 and Under)

Participant Eligibility

1. Each team consists of 1 competitor.
2. The competitor must be no older than 19 years. Age is calculated based on the year of birth relative to the competition year, B.E. 2569 (2026), without considering the month or day of birth.
**Born before B.E. 2557 (2014), as stated in the original rulebook.*
3. One team controller/coach is permitted (or the team may compete without one).

Drone Requirements

1. Only **Skykick 2 / Skykick EVO** drones are permitted. The drone diameter is 20 cm and the total weight must not exceed 120 g (including the battery, excluding the remote controller).
2. The drone must be remotely controlled using a radio transmitter / remote controller.
3. **Only the correct battery model designed for the Skykick drone may be used. Battery modification is not permitted.**
4. The battery must have a clearly readable information label. Batteries with no label or with a faded/illegible label are not permitted in the competition.
5. The competitor must present the drone to the referee for inspection before entering the competition field every time.

Competition Rules

This is an **indoor** competition on a field measuring approximately **4 x 8 meters**.

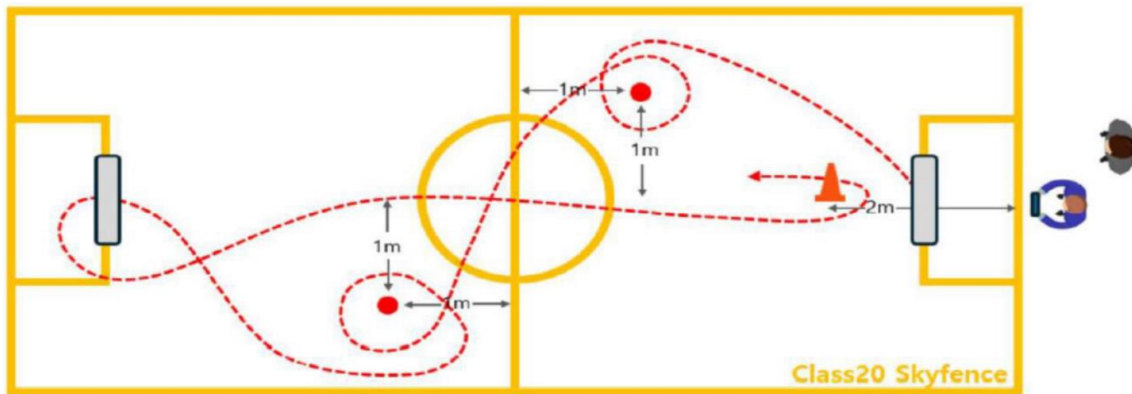

1. Before the competition begins, the competitor must submit the drone to the referee for inspection.
2. After the referee gives the start signal, the competitor has **3 minutes**. The competitor must **fly the drone through the obstacles and follow the prescribed flight guideline**, circle the poles, and complete **10 ring goals** before stopping the time. During the run, the drone may touch an obstacle but must not damage it.
3. When the 3-minute competition time expires, the referee will blow the whistle and the competitor must land the drone (Landing).
4. Each competitor is given 2 attempts. The referee will use the best result - completion of the full course in the shortest time - to determine the ranking. If two results are identical in every respect, the competitor will be required to compete again.

5. Players are not permitted to enter the field until the competition time has ended and the referee has authorized drone retrieval.
6. If any competitor or team intentionally interferes with another competitor's flight and causes a flight accident, the referee will disqualify that competitor/team from the competition.
7. **For any incident or circumstance occurring inside the field, the referee's ruling, decision, and discretion are final.**

***** Note: If any competition rules are changed, the organizing committee will notify competitors on the competition day.**

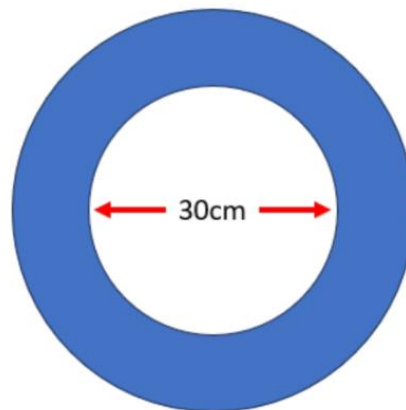

Competition Field Layout

1. The competition field is approximately 4 x 8 meters and is enclosed by safety netting.

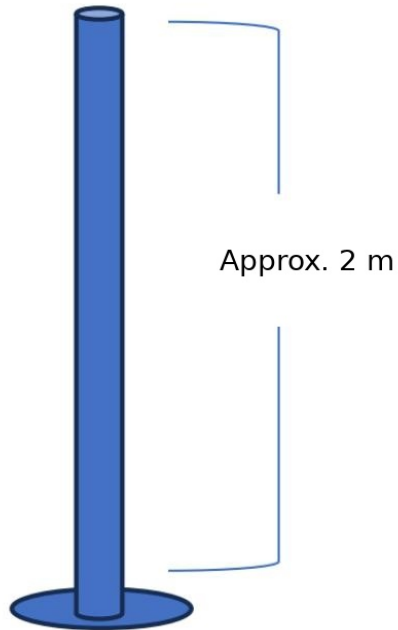

Top View and Drone Flight Guideline

2. The ring goal has an approximate diameter of 30-37 cm.

3. The obstacle pole is approximately 2 meters high.

Responsibility

1. Each participating team is responsible for the safety of its own drone and is responsible for any accident caused by a team member or by the team's drone.
2. The organizer shall not be responsible for any incident and/or accident arising from participation in the competition or from the equipment used by a participating team.
